## The King's Crown Quilt Block Pattern

## You need a light and a dark fabric.

Use the chart to determine what size to cut your patchwork pieces.
(For a 10" block, use the measurements in the highlighted column.)
When only one measurement is given in the chart, that indicates that the piece is cut as a square of that size. The chart may also indicate that some of your squares may need to be subcut:

= Subcut once on the diagonal
$=$ Subcut twice on the diagonal
Sew all pieces together using a $1 / 4^{\prime \prime}$ seam and a 2.0 mm stitch.
Your unfinished block should measure 1/2" more than your finished size. (i.e. For a 10 " finished block, your block should measure 10.5")

## Cutting Chart:

| Pieces |  | Subcut? | FINISHED SIZE |  |  |  |

* You will have one piece leftover
** This strip is cut oversized, and you trim when you square up the block.

## Block Assembly:

Arrange your patches as shown in the exploded diagram.
Sew piece $A$ to piece B. Trim the B edges of unit so that they square up to the A sides to make a perfect right triangle. This forms the right lower corner of the block.

Next, sew the remaining pieces in each row together, then sew the rows together to form the left corner of the block.

Finally, sew the $A B$ triangle unit to the upper left triangle unit to complete the block.
